

# ecoBarn10

# ecoBarn12

## RURAL USES

Machinery Shed	Workshop
Animal Housing	Hayshed
Winery	Stable
Packing Shed	

## COMMERCIAL USES

Manufacturing	Storage
Retail	Workshop
Garage	

## DOMESTIC USES

Dwelling

## FEATURES

- Well proportioned bolted timber frame components made from termite protected Hyspan H2s (termite affected areas)
- Ideal for sea/salt environments
- Hyspan components are unaffected by exposure to acid or alkaline environments associated with fertiliser storage and other chemical storage and processing (bolt and steel components readily upgraded for better durability)

## ADVANTAGES

- Simply bolt together
- Fully demountable - easily relocated
- No specialist skills or equipment required
- Components coded to match easy to follow drawings
- lightweight components - ideal for remote locations or where there is limited availability of lifting equipment
- Looks solid, feels quiet and warm

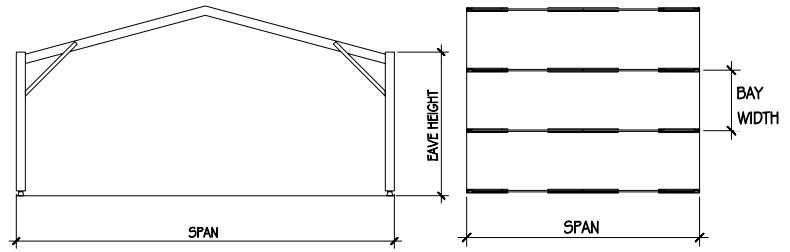

## BENEFITS FOR OUR ENVIRONMENT

**ecoBarn** designed and manufactured in Australia from Australian grown radiata pine - a totally renewable resource, retrieving carbon from the atmosphere and storing for the life of the structure.

Contribute positively to a reduction in greenhouse gas emissions, build with **ecoBarn** instead of other high carbon release materials

**ecoBarn**  
*Not just a shed*

## Standard Dimensions

	span	bay widths	eave height	roof pitch
<b>ecoBarn10</b>	10.0m	3.6m	3.8m	15°
<b>ecoBarn12</b>	12.0m	4.5m	4.8m	15°

Note: Mezzanine options now also available
